

10 JAN 1962

Executive No.

61-9573

MEMORANDUM FOR: Deputy Director (Plans)
Deputy Director (Support)
✓ Acting Inspector General

SUBJECT : Inspector General's Survey of the Office of Logistics,
June 1961

REFERENCES : (a) Memo dtd 29 Sept 61 for DCI from DD/S, same subject
(b) Memo dtd 18 Nov 61 for DDCI from DD/S, subj: "In-
specter General's Survey of Office of Logistics"
25X9A2
25X1A6a [REDACTED] Recommendation Nos. 63.b and 63.c)

The recommendations of the Inspector General's Survey of the Office of Logistics, June 1961, are approved as modified by the Deputy Director (Support) in the two referenced memoranda but with the following comments:

Recommendation #2a; page 7:

DD/P should accept concept that this is desirable but not always attainable.

Recommendations #63, b and c; page 179:

1. Attention is invited to reference (b).
2. The key to the problem is found in paragraph 3 of the DD/S memo:

25X9A2 "It is imperative that the methods and techniques developed by the [REDACTED] Section be designed for the materiel which Logistics has to deliver."

It is perhaps significant that the quoted sentence does not add: "and vice versa." This "vice versa" is equally as important as the original sentence. Thus, unless the administration of the activity accepts the obligation of the "vice versa," and prepares itself to carry it out to the maximum feasible extent, the users have no recourse but to insist upon their own management of the activity.

~~SECRET~~

3. It is directed, therefore, that the transfer of responsibility be in accord with Recommendations 63 b and c, and that at the same time DD/S ensure that management, meaning, and control of the activity be in accord with the principle in paragraph 2 above.

25X1A9a

C. P. Cabell
General, USAF
Deputy Director
